## Brilliant in the classroom

These classroom room projectors are the first to integrate BrilliantColor™ with such impressive power.

The revolutionary Learn Big IN35WEP and IN37EP digital multimedia projectors feature the latest DLP® BrilliantColor™ technology for true-to-life color reproduction with unrivaled accuracy. Unlike LCD projectors which use only 3 hues, the IN35WEP & IN37EP make use of up to 6 separate colors which perfects midrange clarity and brightness. With 2500 and 3000 lumens respectively and a wireless-ready architecture these Learn Big projectors offer a new level of performance and features.

For the attentive student, the IN35WEP offers higher native resolution than 720p HD display devices while the IN37EP has ample power for large spaces with lots of ambient light. Also, with 30 degrees of both Horizontal and Vertical keystone control these projectors will make a perfect square (or rectangular) image on your screen no matter how challenging your install project. With the IN35WEP & IN37EP you get the dependability and long life of DLP, with the true colors and clarity which were previously missing.

### Long term performers

These three projectors all feature the BrilliantColor™ chipset from DLP. Users and audience members are now free from fading colors and decreased contrast, while all LCD-based projector systems fall victim to this costly “battle against the clock”. Over time InFocus DLP projectors yield a lower expense and continually outperform LCD projectors. The IN35WEP & IN37EP implement InFocus 24x7 operation standard and utilize a new 3500-hour high-output lamp. Internal components are kept cool, controlled and isolated from the elements, allowing you to project 24-hours a day without worry. Designed for high-resolution video and data sources these innovative projectors will showcase every multimedia presentation as you’ve never witnessed – until today.

## Wider views

The Learn Big IN35WEP features the very latest DLP technology, including BrilliantColor™ and Wide-XGA resolution. WXGA is the standard of widescreen laptops, so it will duplicate your computer image with great colors and 100% pixel accuracy. Just as importantly, this wide image provides more viewing area without a taller picture which your students may not be able to point out or otherwise would crane their necks to see clearly.

◀ Digital and analog video inputs combine with audio connectivity, RS-232 control and Kensington(R) security.

## The IN35WEP & IN37EP present:
